

Auburn University

Mentor: Lauren Silvio

Approximate Start Date: August 1, 2022
8-month program duration

For the 2022-2023 SNIP fellowship at Auburn University, the chosen candidate will have direct oversight over the track and field team and assist with the football team on a daily basis. This opportunity will provide an experience with a wide variety of athletes who have many different nutritional needs with the responsibility of organizing and leading group educations, individual consults, and cooking demos. This fellow will also be involved with our fueling station worker program, so that the fellow gets experience organizing and managing students. The fellow will work directly with myself for 15+ hours a week and will have the opportunity to work with the rest of the dietitian staff (4 Full Time, 3 Intern/GA RDs) as well throughout the experience, including learning about ordering, inventory, budgeting, and collaborating with an athletics dining facility to write, edit and review menus. This experience would run from August-April. We hope to create a well-rounded experience for the fellow as a part of our team and prepare them for a full-time position following the SNIP fellowship.
